

***drabaz** Runic:  Pronunciation: /'dra.βaz/

noun · neuter · z-stem

Meanings

dregs

Etymology

Possibly derived from Proto-Indo-European *d^hrób^h-o-s, an o-grade form of root *d^hreb^h- ('thickened sediment'). Cognate with Proto-Slavic **droba* ('sediment') and possibly related to Ancient Greek *τρέφω* (*tréphō*) (tréphō, 'to thicken, curdle'). Or possibly from a non-Indo-European substrate.
