Etymology

From earlier *drahstaz, from Proto-Indo-European *dʰragʰs-tó-s, from *dʰráks (‘dregs, sediment’), possibly from a substrate language. Cognate with Proto-Balto-Slavic *dragjāʔ* (‘dregs, sediment’), Albanian *dra* (‘sediment, dregs; smudged butter; sweepings, dirt’), and Latin *fracēs* (‘oil cake: grounds, solid waste from olive pressing; the lees, dregs of oil’). Related to *dragjō (‘dregs, sediment’) and *drōhs (‘dregs, sediment’).
