

***kagô** Runic:  Pronunciation: /'ka.ɣɔː/

noun · masculine · an-stem

Meanings

1. bush
2. stalk, stem
3. treestump

Etymology

Of uncertain origin. Kroonen proposes a derivation from a northern Proto-Indo-European *ǵogʰ-on-, from a root *ǵogʰ- ('shrub'), and adduces Lithuanian *žāgaras* ('twig'), Latvian *žagari* ('shrubs') as cognates. The ultimate origin could be related to English *cog*, or Old English *cæg* ('key'); see also Proto-West Germanic *kaiju ('peg, key').
